mcp

https://github.com/jlowin/fastmcp?tab=readme-ov-file#tools
https://github.com/jlowin/fastmcp?tab=readme-ov-file#resources
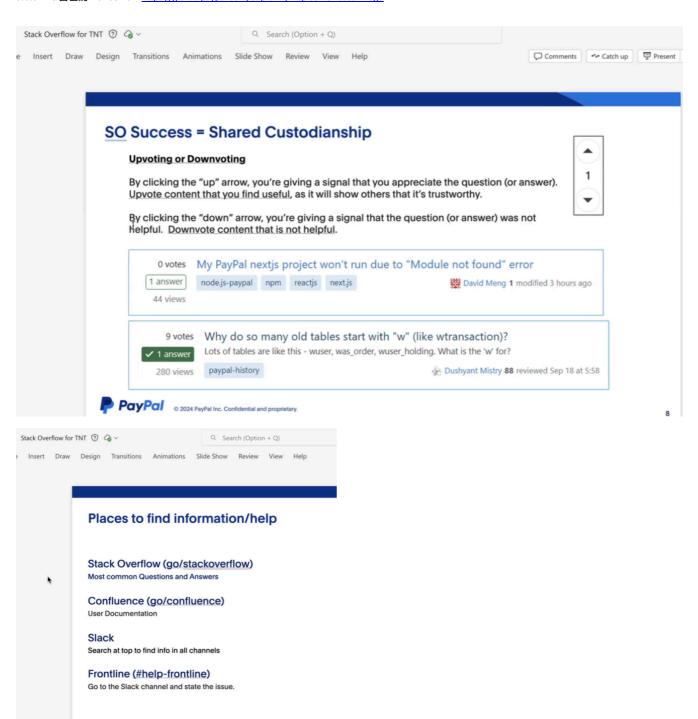

mcp.tool()和resource()的区别，可以类比于POST和GET -

Tools allow LLMs to perform actions by executing your Python functions. They are ideal for tasks that involve computation, external API calls, or side effects.
Resources expose data to LLMs. They should primarily provide information without significant computation or side effects (like GET requests).
GitHub - jlowin/fastmcp: 🚀 The fast, Pythonic way to build MCP servers and clients

我早上跟着这个文档走了一下，还是蛮清楚的，就是教怎么使用他们的base image，
customize 自己的MCP Server - https://github.paypal.com/edp-aiml/mcp-server-base-image

Web inspection 包一个mcp server

Web inspection 包一个mcp server

公司可以改一下，提供基本的web inspection view 功能开放出来

学rag 课程，rag培训；线上部署web inspection 问题，api ，log
记忆 或者predefined
Call out

推代码
Sgau meeting
今天推代码
